EXTEND FUNCTIONALITY OF YOUR EXISTING Captaris® Alchemy® WITH AuLogic's eBuild Application

As business processes, management decisions or customer requirements dictate functional changes in how your Information is formatted, organized, searched or displayed in your existing Captaris® Alchemy® repository file structure eBuild enhances existing core application functionality and provides an easy to use powerful tool to make it happen.

eBuild is an Application integration that packages several different functionalities to improve any business process and streamline core functionality. eBuild Image tools provides the ability to attach multiple documents to a single email, split individual pages out from a multiple page document and convert to PDF, Merge two PDF's

eBuild Database Statistics report back the contents of the Repository detailing each file type (Tiff. .PDF, .Doc, Etc.) and displays how many total pages including multiple page documents. eBuild Update Profile Fields allows renaming of document profile fields by combining contents form other document profile fields.

EBUILD INTRODUCES ESSENTIAL SIMPLE TO USE FUNCTIONAL TOOLS FOR THE ALCHEMY® DOCUMENT MANAGEMENT

Organizing and manage documents in Alchemy® is already a breeze however the AuLogic eBuild application now provides an integrated enhancement solution which can easily streamline the existing business process of sending an email from Alchemy® while helping to improve operational efficiency and repository organization and document search productivity further reducing costs. eBuild provides an immediate ROI when there is a need to convert .Tiff images to .Pdf or when it is necessary to move data from one or more existing profile fields into a new field (i.e. Customer Name, Customer Number, File Date can be combined into the :document title field replacing the default 00001.tif) Database Statistics can be used by service bureaus or customers to count both multiple page documents and the number of pages.
